Features

For biofireplace from ZODIAC line limits do not exist, such devices do not require complicated installation or connection to the chimney, they are **easy to install and to use**. They can be placed both in a spacious house or a smaller flat. Biofireplaces are also an excellent solution for interior design.

The wide range of products enables to use it in the most original ideas.

Standard equipment of biofireplace:

- Biofuel container: absorbing insert placed in container provides safety of the biofireplace and eliminates any risk of spillage of fuel, even in case of biocontainer's overturning. Biocontainer is made of stainless steel. (ATTENTION!! Once the container can be poured up to 50% of its capacity. Larger amount of liquid may cause pouring it while possible tilting).
- Regulating handle the container.

Assembly method:

Standalone, does not require mounting, to place anywhere.
